Disclaimers and Information

Disclaimer

This series is under constant development (things will be added, changed or scraped) and is unrated but this does not mean that anyone can watch it, please be responsible and don't watch if...:

- Easily panicked
- Get extreme nightmares
- Not able to understand the fact that this is all fake and that acters exist and no-one is getting harmed
- Under the influence of drugs or alcohol
- You do not like strange ideas that some people may call “kink content”
- HAVE P.T.S.D
- You do not like horror
- You don't like weird people
- Do not like furries / Don't understand furries / don't understand the difference between Furries and Therians / don't understand that this is fake, (there are people out there who believed that one CSI episode about furries was real, this is why im having to say this more than three times

(the above are guidelines only, anything beneath are MUST NOT!!!)

- Not the age of 18 or above (“only for the slides”)
- Not mature
- THIS SERIES SHOULD NOT BE USED TO EXPLAIN WHAT A FURRY IS!!!!! (it is very obvious why you should not do that)

Do not attempt to copy and paste my content as it is protected under copyright, however you are allowed to build you own just make it different and unique, (you can use my ideas and you can make whatever you want with it...just don't copy and paste... and claim it as your own work... please tell me what you are doing first)

DO NOT attempt to recreate any fight scene, they have been performed by professionals who know what they should and should not do

PEGI NOT RATED

THE-PROFESSOR

©AXLE-NEXUS-FOX, ask before copying ideas

Less than 3% of my work is A.I assisted

THIS SERIES HAS:

- Fighting (that should not be replicated)
- Stupidly long talking bits without any action, which is unfortunately necessary
- Gore
- Mind-Gore (stuff that doesn't make sense
- Over drama-sized and unrealistic scenes that would never happen in real life
- Over the top and over pronounced explosions
- Lots of odd topics

THE-PROFESSOR
Documentation

Not To Brag About Anything But...

I am qualified to do this, I have blanked out any identifying information because i do not need any paparazzi turning up and taking photos of me (or anyone who helped) while i'm trying to walk,

The documents are referring to V-0.00.12-IN-DEV (the earliest version of the professor that the people who reviewed my project have seen) since then i have spent countless months refining the professor,

I am so thankful that I was given the opportunity to make such a amazing project,

ual: awarding body — Level 2 Diploma in Creative Media Production and Technology

Unit 8: Personal project and presentation in creative media production

On successful completion of this unit the student can:	Comment	R	P	M	D
Planning & Production **1.1** Identify and plan a creative media project.	**Dist** - Detailed and effective planning and organisation identify and plan for your media product, with clear commitment and subject engagement evidenced within the blog.				✓
1.2 Develop a creative media project within agreed parameters and timescale.	**Dist** - Organised and substantial production against timescales.				✓
Research **2.1** Identify appropriate research sources.	**Dist -** Thorough and sustained research and investigation to identify appropriate and relevant sources. Accomplished and considered interpretation of information used to inform, develop and extend ideas.				✓
2.2 Use research activity to develop ideas in support of a creative media project.	**Dist -** Thorough and sustained research evidence to develop ideas and support the final product created.				✓
2.3 Assess the value and effectiveness of research material in developing ideas for a creative media project.	**Dist -** Thorough and sustained assessment made about the research and how effective this was in developing ideas for the final product.				✓
Practical Skills & Presentation **3.1** Use media methods and technology skills to produce a creative media project.	**Dist** - Accomplished demonstration of processes, skills and use of media methods and technological skills to produce your final product.				✓
3.2 Identify and use appropriate presentation techniques for a creative media project.	**Dist** - Accomplished demonstration of processes and demonstration of appropriate uses to present your final product.				✓
Evaluation & Reflection **4.1** Assess a creative media project against identified parameters and timescale.	**Dist** - Perceptive evaluation and interpretation, demonstrating clarity in thinking and decision making used to inform and progress ideas.				✓

Unit 8: Personal project and presentation in creative media production

Candidate ID [redacted] Date 08/06/2022

Pathway Creative Media Production

Centre [redacted]

Assessor/IV /Ext. Moderator APM & ST /

Comment as appropriate

CMP Blog Link: [redacted]

Well done on creating such a creative piece of work [redacted] You showed skill and enthusiasm through your VR Short film and documented the process well through your blog.

Research
You were able to clearly identify and meet all research tasks thoroughly, with multiple contextual tasks which had thorough ideas and showed an ability to determine your own understanding for the project in hand. This can be improved in future tasks by attempting to use more autonomy.

Planning & Production
You created an extensive range of tasks that showed a good skill set in this area. A lot of work in character design and back story was created for this stage of your work. The trailers were an effective use of time and showed great subject engagement in this stage. Worked well to timescale and future developments could be made to extend further ideas and challenge himself individually as opposed to waiting for suggestions.

Practical & Presentation
The practical task showed an accomplished demonstration of ability and skill of production in this area. It is creative and effective, and keeps the viewer entertained. The final film is presented well in a themed blog. The potential to improve on a shorter version and to adhere to the feedback in bids to improve the overall production would benefit your end results.

Evaluation
The evaluation tasks such as the character self evaluation were detailed and highly creative. The overall reflective tasks showed clarity and demonstrated your own strengths and area for improvement well. Writing style is something to consider and improve on in future endeavours.

YouTube

Hi AXLE FOX,

Thank you for your removal request. We've reviewed it and provided updates below.

Request resolved

Thank you for your request. We've reviewed your delayed copyright removal request and we've let the uploader know that they have seven days to take action before their video is removed.

During that time, the uploader may choose to do one of the following:

- Do nothing and allow the video to be removed after seven days.
- Get in touch with you to request a retraction of the removal request.
- Delete their content, which will cancel your removal request and avoid a copyright strike.

We use a combination of automated systems and human reviews to process removal requests.

You can track the progress of your removal request at https://studio.youtube.com/channel/UCscMQcGY_NEvxsZwnsSpnEg/copyright/history.

Videos in question:

https://www.youtube.com/watch?v=CaDOIG62dJc

We use a combination of automated systems and human reviews to process removal requests.

I do not wish to cause anybody stress or sadness however I have the right to protect my hard work, content, assets and company from any bad actress

BY CONTINUING…

You agree that you are sensible and able to understand weird concepts, you also agree that you are not easily confused by scientific terms - words and concepts, or peoples own minds…

Please be responsible…

YOU HAVE BEEN WARNED!!!

One last thing…

All of this almost never happened, it has been a consent uphill battle with life throwing almost everything at me, so I will kindly ask for one thing… a donation: patreon.com/AXLE_NEXUS_FOX

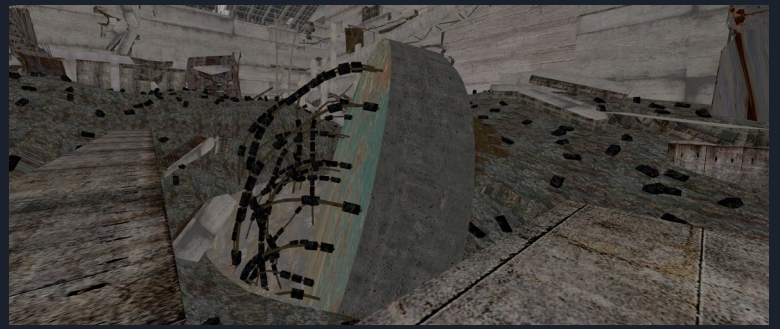
If you can't / don't want to donate don't worry i won't hold you hostage LoL

THE-PROFESSOR

The Start

The concept behind THE-PROFESSOR, And what is Nexus?

(SO IT BEGINS...)
AXLE-NEXUS-FOX falls Into the machine and ends up in a weird place that they do not know, They look around for any signs of life and eventually stumble across a protogen and an avali (CONCEPTS) would be about Axle going to talk to Jack Smith to find out if they know were Aki nomad is, after the talk the professor goes to their last known location...
Axle has almost total control over the entire simulation and can do whatever they want with it, however Axle will need to kill chip in order to have complete control over it. The simulation hosts conscious life thriving inside which was was not intended by the curators of the simulation.



Nexus was founded by asynchronous labs (aka Async Research institute) on the 5th of may 1982 and is located In costa-de-Noimerk (mexico city) Nexus was made to see if it is possible to simulate a simulation inside of another simulation (this was atteved on the 12/31/1990 at 23:59.59)

Nexus isn't the best company as safety takes a backseat and corruption is rife between Async and Nexus, Axle and Marv knew that they had to do something about this but couldn't until they had more people on their side
After the explosion in 2006 (that shook the planet) the facility and everything around it became abandoned as it was too dangerous to approach, sometime after that, costa-de-Noimerk became the next thing to be forgotten about, and after that humanity collapsed

What was happening on Kúrth

The assasonation of Alan Turing during WW2 extended the war way into the future and had given germany a helping hand however miss management within the defence and attack coordinators had changed their direction towards Russia before they could advance to britain allowing them to gain vast amounts of land in the east but losing the western front, they eventually took 90% of Russia and 30% of europe in 1974 at the expense of countless (thousands and thousands and thousands) of innocent victims, soldiers and “their own” A fake peace deal was then made by the Germans to allow them to keep what they have gained

COSTA-DE-NOIMERK (City-of-Mexico)

In 1982 a company called Asynchronous Labs aka Async Research institute finished the construction of a new laboratory for a brand new project codenamed Reality Engine and was keeped a secret from the public, this facility would be used to make a Matrix simulation

Async Research institute (info)

After the failure of a classified experiment in 1949 the company started looking into simulative technology, this led the company down a very profitable path which gave the company a incentive to improve compute technology at all costs, the company would end up making a sub company called The Nexus Group in so that the main company could focus on bigger projects like jumping to parallel universes and dimensions to try to figure how to collapse Germany

Nexus (info)

The Back-Story

Axle was abandoned by his family and left to fend for himself at a very young age of 5, (Axle's family was forced to abandon Axle because the Nexus Group was forcing the government to find test subjects as young as 4 years old) Axle spent most of this time in abandoned buildings until a NEXUS employee named Marv Gatehouse found Axle in a old abandoned garage on the 04/04/1995 at the age of 9, Marv (or Mark) named him Axle Nexus Fox because of the fox like appearance that Axle has, Marv Gatehouse and Axle Nexus Fox became best friends and they have each-others backs, Axle is age 16 when the events of the professor take place. Chip was stabbed in the back by his friends and family when he was just 10 years old with verbal and physical abuse which affected his mental health, Chip found work at Async age 12 and eventually ends up working for NEXUS at age 28, Chip is age 44 when the events of the professor take place.

August/07/2006

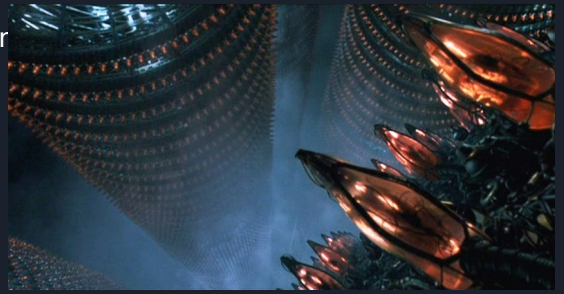
Axle had enough of the mismanagement by the company and (with the help of their friends) manages to put a end to the company (as well as to almost all of the humans that were fighting to keep the madness going) however the Protogen called Chip was shoved into the Stargate machine to try and save the company and end democracy (this was very bad as chip had a chance of escaping the simulation and causing mass amounts of pain and suffering from outside)

Axle soon realises that someone has been shoved into the matrix and decides to go after it to try and kill it, Axle desieds that putting Mark in charge of the entire complex and the matrix seemed like the best course of action as Mark was friends with Axle, however Axle didn't realise that Mark would make Axle the systems new A.I and sacrifice himself as the entire planet would have been completely destroyed as there was a bomb attached to the main fission reactor that was running the Matrix, however Mark failed to realise that assigning Axle as the A.I would permanently attach him to the matrix simulation, Shortly after the professor and chip fall into the machine everyone within a 12 mile radius was baked in 900 degree heat because 10 of the 15 surface reactors were sabotaged by a unknown group of individuals generating a blast so powerful it sent shockwaves throughout COSTA-DE-NOIMERK and killed lots of people as structures could not withstand such force, the extreme amount of radiation that came from the obliterated reactors slowly seeped into every corner of the globe triggering false nuclear strike alarms which caused the US to fire upon germany casing a hot war that lasted 5 hours until there was nobody left to continue the fighting on any side, the nuclear fallout then slowly killed or mutated the remaining suivers , the underground Nexus complex was the only thing that was not obliterated or affected by the radiation,

Axle's parents were able to escape the madness by hiding inside the very same Nexus building that caused all of the mess in the first place, they end up wandering through the war torn corridors until they somehow manage to fall into a subgate and "wake up" somewhere nearish Axle but end up walking in a different direction to a safe area called Arena 001

How the Matrix-Gate works

the simulation gates would knock out anyone who entered the machine and attach ther



The simulation’s Time settings

The simulation’s time frame was set at 12/04/2000 (US) when Axle ran into the master gate, however time in the matrix was set slower than “real life” by Chip the protogen and Axle couldn't do anything about that until Chip was killed, one year in the matrix was four years in the real world, Axle took 25 years in the matrix to kill chip which means that he took 100 long years in the “real world” (by that time civilization on kirth had completely collapsed and there was nothing left…so Chip got what it wanted) (2000-2025 in the Matrix) (2006-2106 in the real world)

After Axle and the Avali’s killed Chip the time inside the simulation was set up to “move faster” than the real world so 100 billion years in the simulation is exactly one second in the “real world” meaning if you look at the “real world” from inside the simulation it would appear that time has stopped, this was done so that the Avali's could find a way for Axle to get out and see their family home (or whatever is left of it)

The set age of the main simulation is only 25 billion years

…and half of Kúrth is baked by a nuclear tricore backfire which was caused by a super-critical event in 15 of the 20 reactors devastating Kúrth (earth) and most of humanity as the EMP caused by the explosion destroyed some electronics apart from the stuff in the lower complex, After the explosion the facility and everything around it became abandoned as it was too dangerous to approach, The earthquake sometime after that, costa-de-Noimerk became the next thing to be forgotten about, and after that humanity collapsed

The logos of NEXUS

I considered these looks however i don't like the font of them

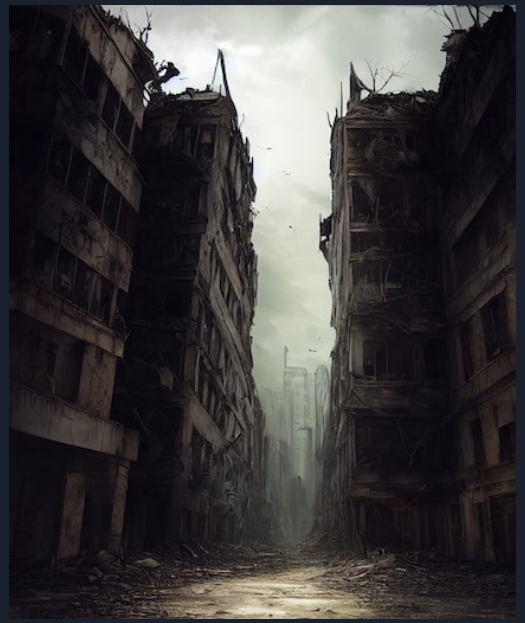
I like this one because it looks straight out of the 90’s

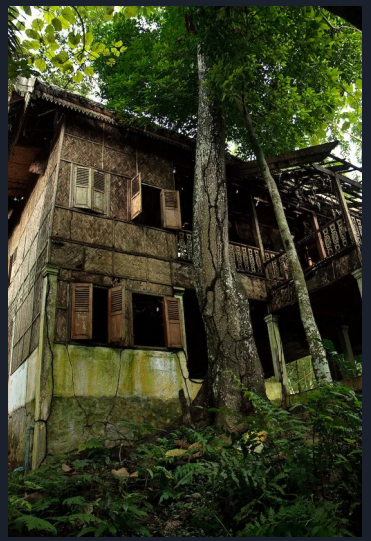
But I like this one more because it is more simpler

THE-PROFESSOR
COSTA-DE-NOIMERK (City-of-Mexico)

COSTA-DE-NOIMERK

This is costa-de-Noimerk... or what is left of it, this city used to be thriving with life and culture, music and happiness... until the explosion that killed everyone in and around the city





THE-PROFESSOR
THE-MAIN-NEXUS-BUILDING

NEXUS_lab floor layout

Lobby = Ground floor
Reactors_0_15_ -2
Secondary_reactor_control_room -4
Sub_reactors -1 -3 -29
Main_reactors (excluding sub) -30
Crew_cabin_floor -45 -46 -47
Pool_floor -47
C.O.R.E_reactor -50
Hypergate -100

NEXUS_lab ground floor

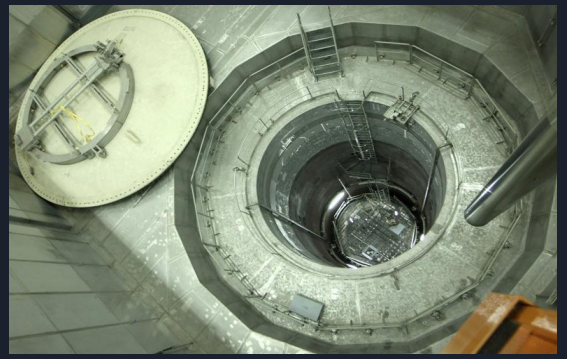
This is the unassuming entrance to Nexus, the entrance is crumbling and soon there will be nothing left of it

This is what the main lobby looks like, it used to show off all the latest and greatest in technology, now all it shows is the sad remains of humanity

NEXUS_LAB_destroyed_REACTORS_0_5

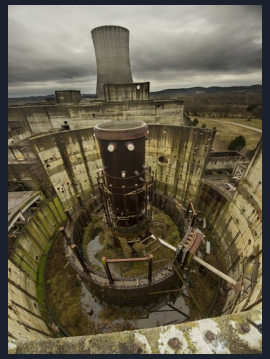
These are reactors 0 to 15 these are the ones that went super-critical destroying all of humanity

Reactor 0 floor -2



Reactor 0_S floor -3

Reactor 3 floor -3



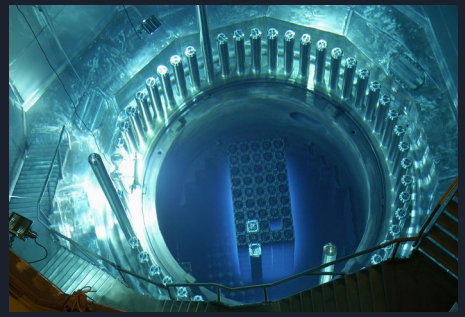
Reactor 5_S floor -1

NEXUS_LAB_SECONDARY_REACTOR_CONTROL_ROOM

This is the secondary control room, it has been exposed to the outside air as the air lock has been destroyed, the equipment is from the 1980’s and is incredibly inefficient

NEXUS_LAB_MAIN_REACTORS

Reactor 16 floor -30



Reactor 16-S floor -29

Reactor 17 floor -30

This is reactor floor -30, reactors 16 to 20 (excluding sub-reactors) are here and in working order, these power the main lab and everything in it (including the matrix)

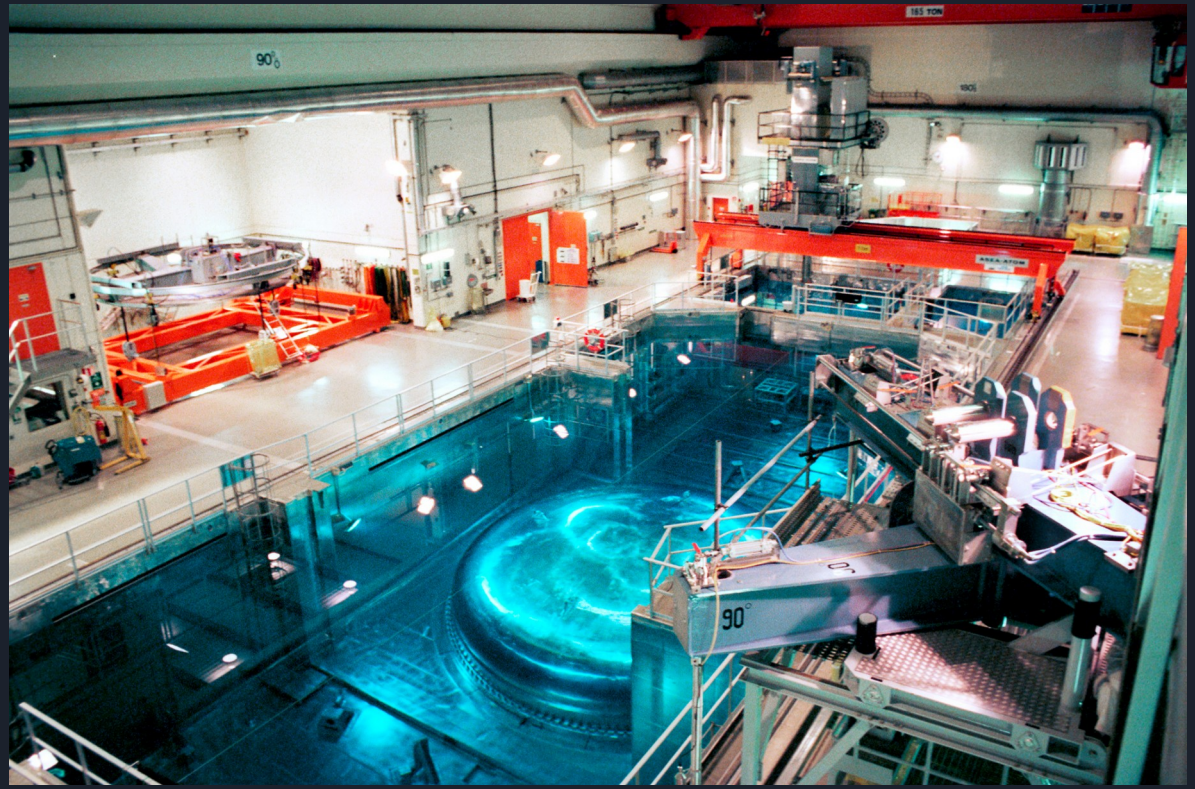
These reactors will remain alive for 1,000’s of centres as A.I robots take care of them

NEXUS_LAB_CREW_CABIN

These are the the crew cabins, these are fully self sustaining (meaning A.I takes care of them)

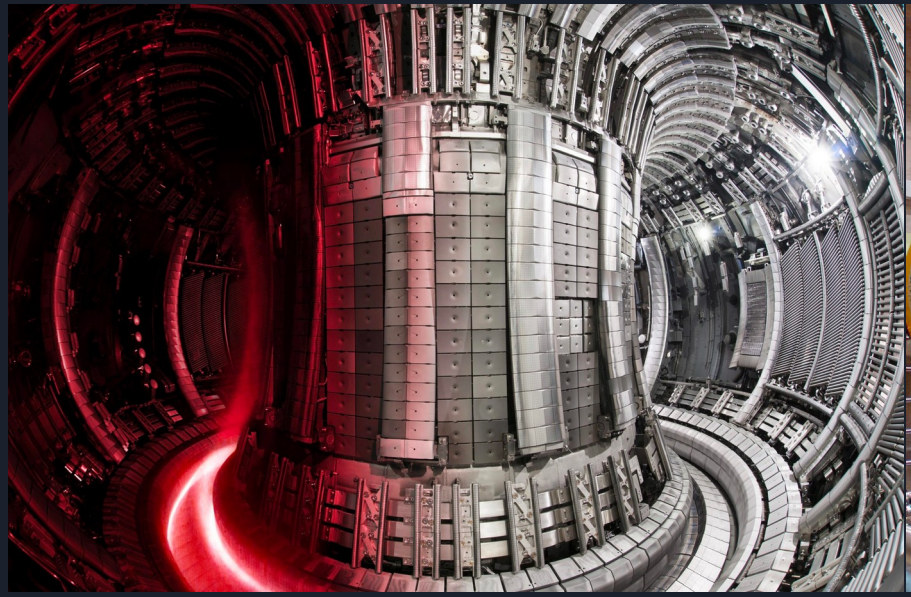
Of course they would look a little more dirty but these are the photos that best match the corridors in the building

NEXUS_LAB_C.O.R.E_REACTOR



This is the C.O.R.E Reactor this is a massive reactor that supplies the matrix and the A.I with power (Axle became the A.I when they ran into the machine)

NEXUS_lab_FUSION_REACTOR



This Is the experimental NEXUS fusion reactor, this does not produce that much power but it can be used as a backup generator, right now this is being used to power a crap fridge that is constantly on

NEXUS_lab MATRIX_SERVER

This is the main server that has the matrix on it, these are kept clean by A.I robots,

there is a prototype matrix server however that has long been forgotten about but some of the prototype server is still working

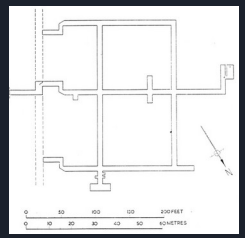
NEXUS_LAB_HYPERGATE

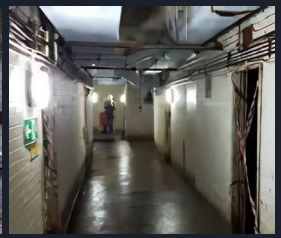
This is the machine that Axle and chip fall into, this gate is used to beam people into the matrix (or into parallel universes and dimensions)
(no i did not take this from stargate I borrowed it)

THE-PROFESSOR
NEXUS-DEEP-SHELTER

NEXUS Deep Shelter

(Based on coulsdon deep shelter)





The Deep Shelter was used to manufacture electronic equipment ranging from air conditioners for lab rooms to more advanced stuff like circuit boards for highly specialised computers that would run complex simulations,

The construction of the deep shelter started on the 10th of may 1982 and was completed on on the 9th of august 1983 and was in commission until the 2nd of jan 1991, from 1991 it was used as a storage depot until the end of 1997 when it was completely abandoned due to the lack of maintenance done to the place, at the end of 1999 the computers responsible for providing power, circulating the air and keeping the entrance gates shut failed due to a floating point error that should have been dealt with years ago

THE-PROFESSOR

Nezahualcóyotl Inn

THE - PROFESSOR - Nezahualcóyotl Inn

(Based on May Garland Inn)

Abandoned just before the events of the professor, the Inn was built in 1890 and hosted many important meetings including meetings that would have ended WW2 quicker and stopped the events of the professor from taking place however the war would end up continuing way into the future because Async took over and destroyed any documents that would have stopped the war and ended their funding, Async used the inn as a small office space that could be quickly hidden from allied forces, these meetings were typically about projects that were going well as well as meetings about how they could keep the war going, the Inn would end up becoming abandoned around the year 1998 and was completely forgotten about by the corrupt government because of a failing economy caused by the war,

The inn was about 60 miles from the edge of costa-de-Noimerk and wasn't subjected to the shocks and debris that came from the reactors when they exploded making the inside of the structure almost perfectly preserved
Legend says that there are some allied forces who had survived the explosion and bombing of the planet using this decaying structure as a makeshift base however that is speculation

THE-PROFESSOR
NAMES, SCRIPTS AND VIDEOS

THE - PROFESSOR In chronological order

1st SO-IT-BEGINS…

2nd THE-PROFESSOR-BACKSTORIES

3rd THE-PROFESSOR-DIMENSIONS P1-P5

5th THE-PROFESSOR-THESE-DARKER-WORLDS

6th THE-PROFESSOR WE ARE ONE

7th THE-PROFESSOR HYPER-ILLUMINATE

8th THE PROFESSOR ULTIMATE

THIS-DEMON-OF-MINE and THIS HEART OF MINE happen at the end of Dimensions, THESE OUTER-WORLDS happens throughout all of the movies and continues after the “ending” CONCEPTS P1 is part of the outer worlds

The names of the main professor series

THE-PROFESSOR SO-IT-BEGINS...

A group of people including Axle try to put a end to the company that has destroyed and enslaved their once loved world

THE-PROFESSOR-THIS-DEMON-OF-MINE

This will tease one of the demons that was made by Chip (the protogen) this teaser short will demonstrate what the monster looks like and what it can do

THE PROFESSOR THIS HEART OF MINE

This heart of mine will show heartless telling the professor to forgive him and to let him join this epic quest to kill chip, heartless and chip had a argument with each other because chip murdered Heartless just to bring him back as chip's undead slave, and this is why heartless wants to beat chip up

THE-PROFESSOR CONCEPTS P1

This is what the short film will be called , it will show what I want to do with my idea while being enjoyable to watch, it will have storyline

THE-PROFESSOR-BACKSTORIES

Backstories will explain/show what Axles life was like before Nexus became part of his life, as well as what his life was like just after he was found by Nexus and taken in (As well as show the backstories of other people I.E RYU, AKI, etc etc etc

THE-PROFESSOR-DIMENSIONS P1-P5

Dimensions is the "start" of the series, this will have most of the main characters i.e David Smith, Chip

The names of the main professor series

THESE OUTER-WORLDS (SUPER SERIES)

The outer-worlds would show how massive the simulation really is, this bit of the series would show Axle finding friends and seeing what life is like for the people in the simulation

THE-PROFESSOR-THESE-DARKER-WORLDS

Darker worlds will be the horror bit of the series, this part would have dark and dreary scenes, this also would be where most the action happens

THE-PROFESSOR WE ARE ONE

This is the bit where I find chip and finally kill him

THE-PROFESSOR HYPER-ILLUMINATE

Illuminate will be the “ending” of the series it will be a very sad but happy end

THE PROFESSOR ULTIMATE

this will show the old professor and the new professor in a white void called the base-simulation (not going to say what happens)

The main scripts

Game Ideas

Project:
REALITY ENGINE

THE - PROFESSOR Game Ideas

I am planning to make a couple of games that explore the universe of the Professor to help boost the popularity of the Professor, My games will slowly become bigger and more detailed as I improve my game making skills and knowledge on how to make them

My first game will be a 1980’s style text based game where It has been 10 years since the explosion that obliterated COSTA-DE-NOIMERK and the very quick war that followed causing human civilisation to be completely wiped out ,

the game would be about a random survivor (That had been turned into a wolf hybrid) trying to find shelter in a apocalyptic world, they happen to stumble into the damaged NEXUS lab only to find that it is full of useful equipment and information on what happened inside the building and to the rest of the planet

The game would mostly be about solving problems and learning about what happened however the player would end up becoming trapped within the confines of the complex and be forced to go deeper into the underground labyrinth, the game would posh the player towards the main stargate and make them go threw it

THE-PROFESSOR

Campfire-Tails

THE - PROFESSOR Campfire Tails

The story of the Avali Race (Professor)

(some data from: The Official Avali Wiki)

The avali species originated as a caveman like tribe about 11,000 years ago and were hunted by humans for quite some time, the spesies only managed to become a proper civilisation by reverse engineering objects and studying notes left behind by human activity

Biology
The wiki states that Avali are made up of a liquid ammonia and stand around 1-1.2 meters tall

What they eat and drink
Old caveman Avali tendid to eat things like Álavonti, álavonti is a plant that grows underground to stop itself from freezing and dying, the plant sprouts leaves called phillips, these are a type of leaf in a shape of an oddly shaped rock and they typically sprout in bunches, the leafs can be eaten cold however they taste better when warmed up

For now i will say that they drink normal water, i'll change this later

I do not claim copyright for anything I added, anything added is for the main floof who made the Avali species (notice the lack of a professor

THE-PROFESSOR
IMPORTANT-PEOPLE

The importance of Axle Nexus Fox (THE-PROFESSOR)

Axle's youtube: AXLE-NEXUS-FOX - YouTube

Axle's twitter: https://twitter.com/AXLE_NEXUS_FOX

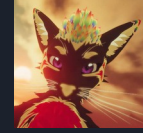
Axle-Nexus-Fox (aka THE-PROFESSOR) is the god of the simulation, Axle redesigned, recoded and relaunched the matrix simulation just before shit hit the fan however Axle forgot to put the Matrix settings into read only unless SyS-OP allowing bad actress to change safety settings an slow unsigned code to run, Axle needs to kill the people who are using the loophole before he can fix the code

Axle does not need to eat, drink or sleep although Axle can do these things and does them as Axle just wants to live a life (even if its a lie)

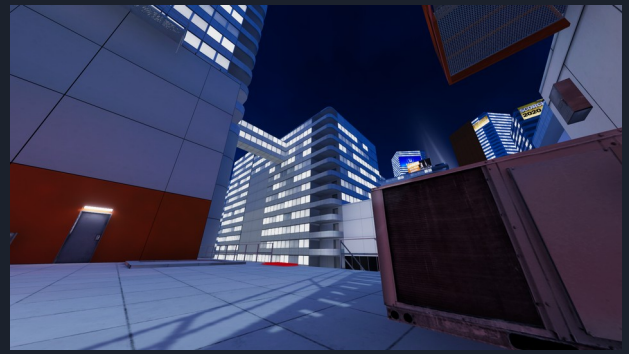
In Axle's spare time (when he isn't causing mischief) spends a little bit of time inventing things on his PC, he then sends some inventions to Ginji to be made and tested on (Ginji doesn't know it's Axle that is sending them) Axle also has his own lab where he can make anything he wants,

Axle' height is usually 1.78 meters however Axle can become macro (grow) or micro (shrink)

Axle was born in 1986 : age 16

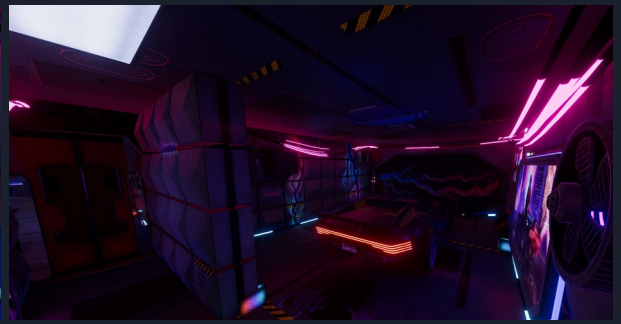


Axle’s home city



This is The-City-Of-Glass aka outer Costa-De-Noimerk (City-Of-Mexico).
These are night photos so it’s going to look cold and lonely but this city is anything but cold… This city never sleeps and is full of nightlife, with bars open 24 hours on weekends with dj’s blasting out music, life is thriving in this huge loved city, when walking the streets of this place (or relaxing on a balcony) you can hear the the Avalis singing along to the music that flows through the city as well as the hussle and bussle of people moving around making the city feel very much alive.
Axle likes spending more time in a smaller apartment located in the heart of the City of Glass then in his bigger apartment in Noimerk because the mayor is nice and listens to the people of the city unlike Noimerks mayor

Axle’s house (not in The-City-Of-Glass but in downtown Noimerk)



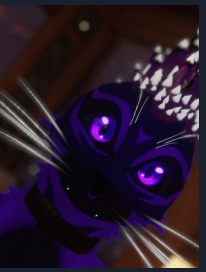
Axle used to live In a “very cheap” apartment, valued at 98.6 million (in great british sterling) it doesn't sound cheap, but when compared to the other “cheap” apartments in the City of costa-de-Noimerk on planet núcleo (nucleus) you would quickly understand why its called “cheap”

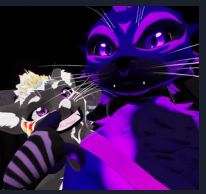
The apartment has one master-bedroom, one bathroom, a living room, a kitchen and a bar area

Axle’s house (not in The-City-Of-Glass but in downtown Noimerk)

Axle likes the apartment as it is in a nice neighborhood (it’s full of strange people willing to use his bar, axle lets them use it for free)

However Chip (the protogen) got someone to nuke the complex (because the building housed weapons that could kill Chip) killing “absolutely no-one” because it was a weekday and not many people were in the main arena bit (However a-lot of people got a very unhealthy dose of radiation)





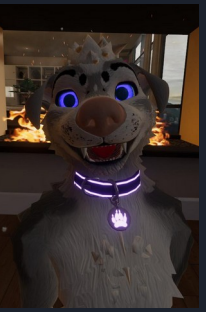
The importance of ALPHA-WOLF

Alpha’s yt: AlphaWolf 9564 - YouTube

Alpha is Axle’s boyfriend

Alpha was born in the matrix but is aware that it's all simulated because Axle didn't look behind to make sure no-one was near him when opening a split rift into the simulations rendering engine down a quiet alleyway, t...

Age 16



The importance of NATE-THE-ADORABLE-DOLL-SIZED-WOLF

Nate’s twitch: nate_the_adorable_wolf_ - Twitch

Nate is like a brother to Axle, Axle would always include Nate on every adventure that he went on (unless Nate said no of course)

Facts about Nate:

Nate is a micro wolf the size of a big doll (0.52M) however they can shrink smaller (Axle doesn't know why they can do this) : Nate loves to climb into ice cream tubs and play with the ice cream like Its snow (Axle learnt this the hard way when Axle went to take a scoop of ice cream and got jumpscared by Nate who was hiding in the ice cream tub) :

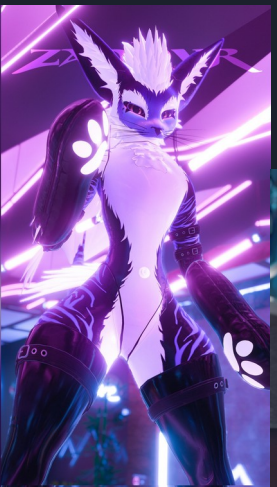
Nate’s backstory: (1987)

Nate was born somewhere far from COSTA-DE-NOIMERK in a place called Ciudad Nezahualcóyotl In 1987 but unlike Axle, Nate was born in a rebel group tasked with destroying the company NEXUS in 1995, the rebel group somehow managed to gain excess to very sensitive information thru a worker who works inside the company (hint Its Axle who is giving them the info that they need to destroy the company :3)

THE-PROFESSOR (2006)

Axle found Nate badly injured in his office trying to calm themself down, Axle tells him that he was the one that was secretly helping his rebel group gain intelligence on the corporation that was committing acts of war on unsuspecting people by using them as test subjects for “things” in the matrix then immediately killing them and removing evidence of their death (ANYWAY…..) Nate trusts Axle after some time however Nate took to long and were shot at by Nexus employees (the wound was nonfatal and Nate passes out due to pain shock) Axle quickly removes the boulet from his wound and applies first aid dressing to it, Axle then straps him to his back and picks up a gun that was dropped on the ground and heads straight for the MATRIX-Gate to try to shut it down (however

The importance of a Big Puffy Nugget called Zapy-Zap-Zap



twitter: @ZapyZapZap.Twitter commission site: zaphyrwalker.commission

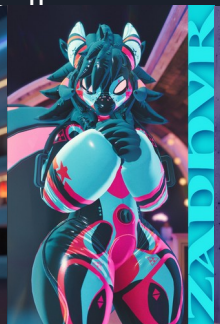
Axle and Zap don't really see each-other that often but when they do they tend to go to the movies or something like that, the reason why Axle doesn't see Zap that much is because Zap is a model for a pool-toy company, Zap mostly spends their free time in and around warm pools and has a pool house which is located in one of the professors x-ground labs in level 0 of the backrooms

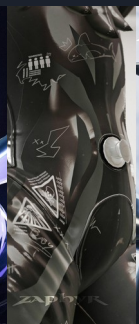
Zaps back-story

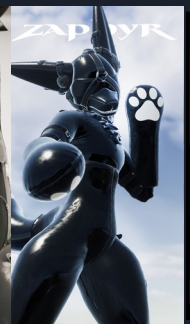
Zaphyr was one of Chip’s experiments, Zap was an average-fur until he was kidnaped by Chip (the protogen) and hold at one of Chip’s labs and experimented-on I.E making his tail longer, making his legs run faster and turning him into a pool-toy however this weakened zap, Chip tried mind wiping him but this failed as the lab that they were holding him at was run-down and old, Chip eventually gave up and abandoned the lab leaving lab equipment, usb drives and test subjects (including Zap) all behind, axle found the lab by accident 3 days later and took everything as quickly as possible and destroyed the building just in case Chip wanted to use it again ,

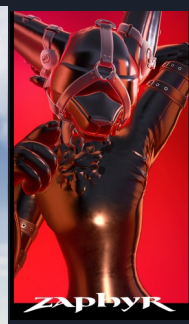
Zap eats air for food but still drinks water to hydrate, unlike some pool-toys Zap can do this through

zaphyrwalker.commission









The importance of Alpha Ryu

youtube: Alpha Ryu Gaming - YouTube twitter: Alpha Ryu (@Alpharyuyt) / Twitter twitch: AlphaRyuYT - Twitch

merch: Official alpharyuyt Merch / Streamlabs

Alpha ryu is a advanced prototype of Axle capable of controlling the simulation with extreme accuracy, Mark made Ryu in the early days of the matrix development stages with the intention of beta testing a couple of things that would end up saving the matrix years later, like the rest of the furs/living beings in the simulation, Aki, Ryu and Gingy all think that the simulation is real life until the professor shows them that they have been lied to and they are in danger… Like the Professor, Ryu is very caring, smart and is able to make the matrix do almost anything they that they want or need, however they only find out that they can control it when Axle demonstrates this

Ryu’s backstory

Ryu was coded into the matrix in 1991 by Mark Gatehouse (the simulation time was set at 1985) Ryu was born on a planet called earth and lives in a place called the US, they lived a “normal” childhood and teenagehood and found success in being a social media icon

The simulation didn't set Ryu’s age correct when being coded in and kept on flipping between two dates, so sometimes Ryu could appear older and sometimes they could appear yung:

Age when the professor takes place 18

The importance of Aki Nomad

youtube: Anubian Nomad - YouTube twitter: (@Anubian_Nomad) Twitter patreon: Anubian Nomad

Aki's twitch

Aki Anubian Nomad (aka Aki Nomad) was born inside the simulation and was unaware that the reality they reside in is simulated, Aki and Ryu went to the same school and college, whilst they were in college they met Ginji

About Aki:

Aki is an Anubian Hobkin and loves to travel with his friends enjoying the sights and smells that come with going abroad, they love technology especially gameboys however such modern pleasures are looked down upon by the ancient ones that aki is required to talk to every so often, the ancient ones prefer to be named The Gods-of-All, these gods are much less powerful than Axle and therefore they have a hatred towards Axle, Aki may try to put on a tough facade and may show an attitude if his gods or small stature are mocked however he can get flustered quite easily, Aki is very upbeat and optimistic and loves head pats and belly rubs,

What they dislike

- KFC
- Being a maid
- Not having all the luxury in the universe with them at all times
- Smelly Rexouiums

The importance of Ginji-Vitis

twitter: GinjiVitis twitch: GinjiVitistwitch

Ginji Vitis (or Ginji) was born inside the simulation but has always been a believer that they are in a video game, Ginji always caused some type of misgive within his college classes however it was all in good fun

is a protogen builder, they custom make the protogen to fit the customers needs

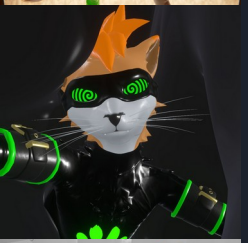
Ginji has their own lab

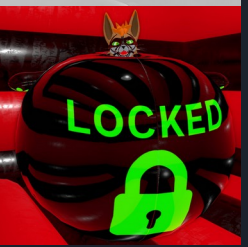
WORK IN PROGRESS

The importance of Fenti

Youtube: FentiTheFox - YouTube twitch: fentithefox - Twitch

THE-PROFESSOR
IMPORTANT-ANTAGONISTS





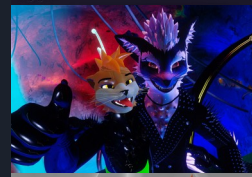
THE - PROFESSOR THE-ANTAGONISTS (story)

(The not so villain) @TaeliouWolf

Taeli (@TaeliouWolf) / Twitter

Taeliou was a one of the matrix-es most feared villains as Taeli hypnotized their victims into walking into traps, that would cover the victim in cloths, latex or other substances … until Chip came along, captured Taeli, took what they had, then trapped them in one of their own rooms for what felt like years to make them unstable and more evil (but it was only a couple of weeks) Chip released them after some time to try to convince Taeli to join him however Taeli very quickly disappeared along with copies of all Chips files and advancements,

Sometime after Axle had put a very violent end to Chip, Axle stumbles across a house that was looking a bit out of place and proceeded to enter the building, inside the building was a mad Taeli with very valuable documents taped to the padded like latexed walls of the basement that he was hiding in, taeli herd the floorboards and quickly hid in a box when all of a sudden the basement door was blown inwards and a-lone Rexouium emerged walked down and audibly gasped at the insanity that this room portrayed, Taeli saw that the rex was distracted and used this opportunity to trap him and have some good old villain fun, Taeli slowly got out of the box that he was hiding in grabbed his eye mask and went to flip a switch when suddenly the rex that he thought was still in shock turned to walk away,
Taeil then made the classic mistake of saying “noo!! Wait” (which Taeli regretted instantly) making the Rex turn around, the Rex looked Tali strate in the eyes and said “oh sorry my bad if I scared you, i've been looking for years until suddenly It all appears at once in a villain's hideout, i’m the professor… if your wondering” Tail then smiles and takes off their mask and walks up to the professor and asks if he can be forgiven, the professor nods and asks if he would like a better place which Taeli excitedly said yes to, but before he could give Axle a hug, axle grabbes the mask that was in their hand and slaps it back onto Taeli’s face, hugs them and says “you will need it” (from a once evil villain, to a ball of excitable energy wanting to



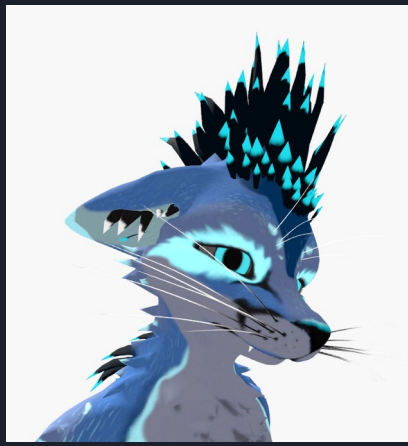
THE-PROFESSOR
CHARACTERS

THE - PROFESSOR CHARACTERS

Axle Nexus Fox, AKA THE-PROFESSOR

Axle is a kind Rexouium, he is eager to help people to get things done quickly

Axle works for Nexus and owns the matrix simulation that chip and himself have made, the professor is trapped inside the matrix simulation forever as Axle can't die, Axle is 16 years old

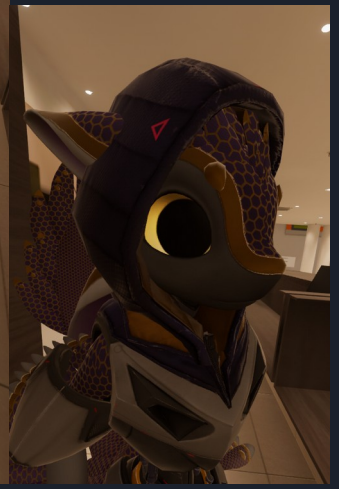


THE MASTER-OF-EVERYTHING (old professor, BROING-767)

This old professor is in the base-simulation and controls all simulations including the simulation that has kúrth inside,

10,700,834,451..... years old

THE - PROFESSOR CHARACTERS



Guillermo the Avali
works at VirtualFurence and is a hotel room manner and cleans up the rooms as well as fixing anything that is broken

Guillermo likes to be lazy but they do their job professionally

Age 85

Chip the protogen
is a evil protogen who worked with the professor to make the matrix simulation that he is now trapped inside of, Chip runs on Windows 10 and is very mentally unstable

44 years old

THE - PROFESSOR CHARACTERS

Jack Smith

Jack works in a lab for a company called black mesa, Jack is very productive but can get distracted, they like making DnB music as well as spending time with his boyfriend David Smith

age 37

David Smith

David is daredevil but trustworthy fox, he likes climbing mountains and skydiving, They mostly like to help people by fixing phones and working on people's cars,

age 35

THE - PROFESSOR CHARACTERS

Heartless

Heartless is a undead rexouium, Chip brought this monster back from the dead just to test whether or not he can bring the dead back, Heartless used to be a wanted villain until they got shot in the heart, Heartless has second thoughts and decided to go behind chip’s back to help the professor

Eyeless

Eyeless was Made by chip and is as dumb as they can get as this was chip’s first attempt at making a demon (that could think for itself)

THE-PROFESSOR
OTHER-INFORMATION

THE-PROFESSOR THE BROKEN DIMENSION

The broken dimension is basically the recycling bin of the matrix simulation,

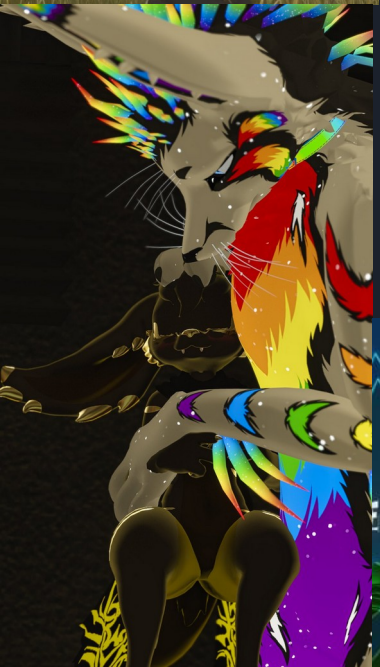
https://backrooms.fandom.com/wiki/The_Broken#fullscreen-1

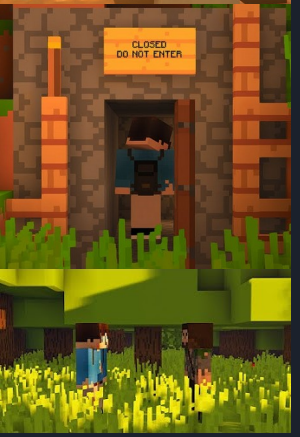
The importance of Aki Nomad’s game-boy

Aki Anubian Nomad’s (or Aki Nomad’s) Gameboy is a weapon in hiding, being made by A-sync corp, this “handheld gaming system” is actually a backrooms controller and is capable of mass destruction of life in many horrific ways, but the main use of the controller is the unintended but very useful teleporter functionality (As level 0, crimson forest, Sky and level 188 have “nether like” location properties that don't make sense at all) however it isn't very accurate and it can sometimes put you 10 miles away from where you actually need to be

Almost all the back-rooms that have been explored for a little while (yes they are more than one level) can be used as a tool, be mined for resources, or just lived in, the back-rooms can be very difficult to navigate through especially the ones that have a small mapped out area (almost all go on forever)

Aki and their friends do not know how dangerous the gameboy is until The Professor shows them





Why is there Herobrine's lake references

The Professor is inspired by Herobrine's lake, I feel like it is necessary to use some of Herobrine's lake’s concepts as they are too good to toss out

The company called Nexus in the Herobrine's lake series is corrupt (they don't show how bad the company is but you get little hints throughout the series) I have used the same company but changed almost everything out, I changed peri-dime (herobrine) to chip (the windows 10 protogen)

I wanted to use what Dylan made, I just couldn't let something this good just rot away like that

The company that Chip is hiding behind

Chip didn't waste any time pondering about in the matrix that they were shoved into, one of the things that they did was start a company called Sync so they had a steady income (other than the money that they got from performing experiments on unwilling people)

Sync is a company that builds and services protogens...

THE-PROFESSOR
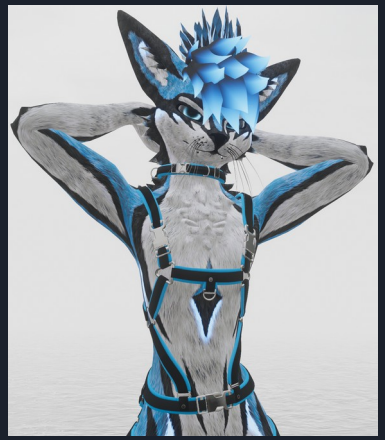
SPECIES-FROM-THE-SIMULATION



THE - REXOUIUM

(Information provided by The Rexouium | Wiki | Furry Amino)

Rexouium stands for (Rex) king and (ouium) Caretaker. The Rexouium Is a rather tall species, they usually reach or exceed a height of 7ft (this is because of their world being 80% of the size of Kúrth aka earth which means the world has less gravity) however like almost all species there are some that don't meet the height criteria these are cald Micros (small) or macros (big)

STORIES-FROM-THE-SIMULATION

THE-PROFESSOR STORIES

HAND-CANNON TUNGSTEN T-1

(This happens just after THESE-OUTER-WORLDS THIS-MATRIX-OF-MINE)

The T1-Prototype was made by a group of 3 highly specialised Avalies in a undisclosed location (on some faraway planet) The Avalis were somewhere far and hidden because they didn't want any of Chip’s spies seeing the weapon as this would put everyone in danger, however that was the last of the groups worries as they were attacked by five of Chip’s allies and had to flee, they all got away safely however the third one (the one with the damaged “semi working” T1) was split from the other two engineers as they ran in a different direction, the avali eventually stumbled across the ship that Chip’s allies used to get to the planet, the avali proceeded to steal the ship and escape to a planet that happend to be Avalon, the avali didn’t realise that they flew all the way to one of their home planets until they saw the Tomson cruiser (one of Axle’s many super-ships), Axle happened to be boarding the ship very quickly with a mixed group of avalis, Rexouiums and nardoragons,

The T1 was designed to be able to destroy a small space-ship however it was not fully tested as the team never got the chance, the avalis needed such a powerful weapon as they were at war with Chip (the protogen) the weapons they had at the time were not powerful enough to get through the armour that chip’s army used.

(external thermonuclear faze generator…

THE-PROFESSOR
THE LOCATIONS OF CONCEPTS-P1

THE - PROFESSOR(the-concepts) LOCATIONS

This is the stargate room, the professor uses this specific stargate as it is the most powerful one that he can get to This will be used for my first scene

This is the Virtual-Furence check-in desk, some avalies that know Axle-Nexus-Fox work here and are happy to give Axle a room for free when he needs one

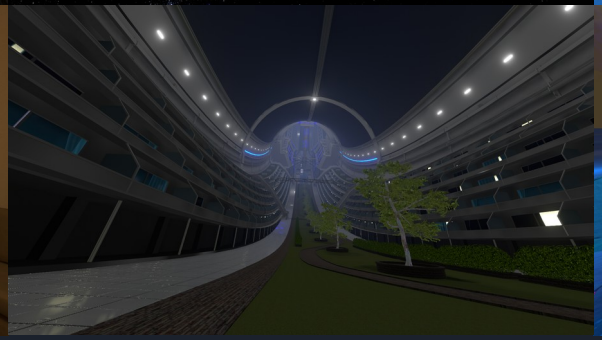
This is the hallway that connects Virtual-Furence to the black cat (well it doesn't but just pretend LoL)

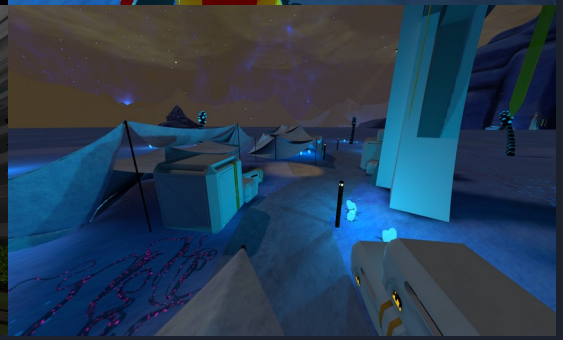
THE - PROFESSOR(the-concepts) LOCATIONS

The-Black-cat (a pub) is going to be used for the middle bit for my short film, this is where Axle buys the Boeing ultimate STAR-CRUISER

This is the Boeing ultimate STAR-CRUISER that Axle bought, this is fast and big… and very expensive, the ship is capable of holding all 77,500 people awake on board for more than 104 years

This old abandoned Avali base on Avalon will be used for my final scene, hopefully the Avalies are okay with this



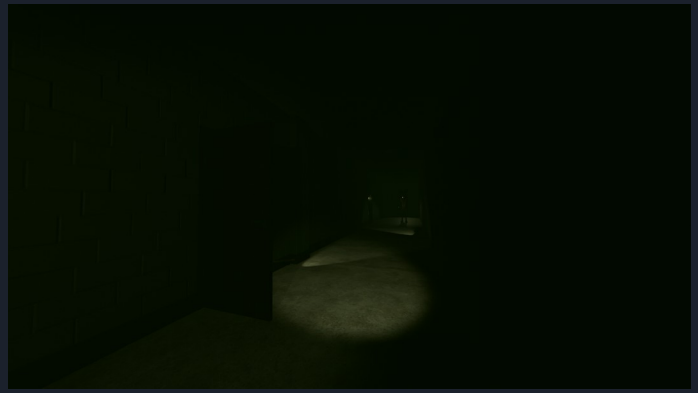


THE-PROFESSOR
THE LOCATIONS OF THIS-HEART-OF-MINE

THE - PROFESSOR(this heart of mine) LOCATIONS

This place is called void by amnesia rose, I will use this map to show off heartless (chip’s third demon)
Heartless saved the professor because heartless knew that Axle was his best bet at exacting revenge on chip (as chip murdered his parents and turned heartless into his slave)

THE - PROFESSOR(this heart of mine) LOCATIONS



This is one of Chips abandoned bases, this was used to hold kidnaped people that were going to be used as test subjects

THE-PROFESSOR
OTHER STUFF/JUNK

I have chosen to focus on making a steampunk like junk spider nicknamed Sparky. These very friendly and helpful (but scary looking) spiders come from Zenith (Zenith is a protogen planet).

I choose a spider because of their ability to climb up walls and walk on ceilings, spiders in general seem very robotic to me because of the way they move and the fact that they mostly stay in one spot for a very long time doing nothing at all (spiders are pretty chill).

What the spider does:

- Sparky likes to be next to wireless chargers as this is how the spider charges.
- The spiders spend most of their time sitting on someone's shoulder (they tend to like protogens more).
- The spider can charge devices or protogens that are low on power.

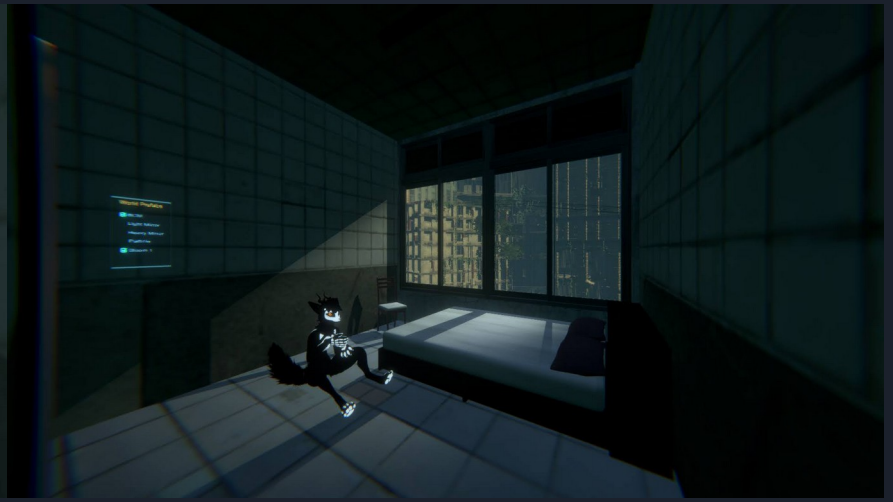
This type of spider was made by Ginji Vitis (Ginji is a cat like creature called an Impim). The reason for the spiders creation was that one of Ginji's friends was afraid of spiders, so in an effort to make them less scared of them, Ginji created Sparky, the friendly junk spider.

My spider will have a green front (main) and back (rear) body, this is because of the circuit board, (I will not use paint to change colour of parts).
I will try to make the legs from bare metal, my backup plan is to strip junk wire and use the copper as legs. The eyes will be LED's and will be connected to the body by junk copper wire, the back of the spider will use a white plastic LED light bulb cover to add more bulk.

My model will not have lights that light up or legs that would move, the model will just be for looks and not do anything.

Sparky was made on Zenith but then was moved to the city of Vex-helm on planet Alpha Rion. Like Costa-de-Noimerk, Vex-helm is a very busy city full of life, people and noise, however unlike Noimerk, the city's main power is generated from old fashioned steam engines that produce lots of smoke.

The importance of small details



In this scene you can see a old apartment with a view of an old abandoned city through a window

The lighting is dark in the room however it doesn't look that good, the room is over-lit and the shadows are dull

this is the same scene however you can see the shadows are more pronounced as well as the room being properly lit

You can also see a slight bloom on the bed and on the rexouium

This matters because not having good lighting can ruin a good scene

I'm also a perfectionist
